

Lucas Chiang

12203 Linden Linthicum Lane, Clarksville, Maryland 21029 | 410-782-1941 | lucaschiang07@gmail.com

Education

Purdue University

West Lafayette, Indiana

Class of 2030 — Current Weighted/Unweighted GPA: N/A

- Relevant Coursework: CS 15900, ENGR 13300, SoCET (System on Chip Extension Technologies)

River Hill High School

Clarksville, Maryland

Class of 2026 — Weighted/Unweighted GPA: 4.83/3.96

- Relevant Coursework: AP Physics C Mechanics, AP Physics C Electricity and Magnetism, AP Calculus AB, AP Calculus BC, AP Chemistry, AP Computer Science Principles, AP Biology, Differential Equations

Research

mmhLabs (DREAM Lab)

Onboarding Fall 2026, Joining Spring 2027

Purdue University

- Completing an independent study to prepare to join mmhLabs, a research group developing dynamic, regenerative, and adaptive electronic systems
- Will manufacture and test printed circuit boards to benchmark the lab's IC platform against existing components, evaluating its potential to reduce the size of necessary electrical components

Research Intern, Department of Mechanical Engineering

Summer 2025 – Summer 2026

University of Maryland, Baltimore County

- Created circuitry to power a heart sensor using integrated circuits and wearable thermoelectric generators
- Patel A, Lombardo J, Chiang L, Madabushi V, Kulkarni S, Madan D (2025). "Designing and Constructing a Thermoelectric Powered Self-Sustaining Sensor Platform." Poster presented at the University of MD Summer Undergraduate Research Festival
- Chiang L (2026). "Utilization of Commercial Peltier Thermoelectric Generators for Continuous Wearable Device Use." Paper published in the Oxford Journal of Student Scholarship, June 2026, Volume 8, Issue 2

Research Intern, Department of Physics

Summer 2025

Towson University

- Created thin metal oxide films using Pulsed Laser Deposition, and tested resistance
- Chiang L, Toomer C, Previti M, Pokhrel S, Kolagani R (2025). "Modulation of Electrical Transport and Structural Properties of CaMnO₃ Epitaxial Thin Films." Poster presented to the research team at Towson University

NASA Data Science Analysis and Scholarly Research Paper Writing Intern

Summer 2024

George Mason University

- Conducted independent research analyzing ground-based data from the George Mason Telescope to determine whether an object of interest is an exoplanet
- Chiang L, Plavchan P (2024). "Ground-based Light Curve Follow-up Validation Observations of TESS Object of Interest (TOI) 5868.01." Published in the SCHAR AstroScholars Journal and the George Mason MARS Repository

Collegiate Project Teams

Purdue SoCET — STARS Chip Design Skills

Fall 2026 – Current

Elmore Family School of Electrical and Computer Engineering, Purdue University

- Selected as a freshman for Purdue SoCET (System-on-Chip Extension Technologies), a program giving students hands-on experience with an industry-quality System-on-Chip design flow spanning architecture exploration, RTL design, and verification
- Learning digital logic fundamentals, circuit design, transistors, and SystemVerilog through a semester-long curriculum covering combinational and sequential logic, testbenching, and block diagramming, culminating in an FPGA prototype project
- Working toward a chip tape-out in the second-semester STARS Chip Design Project following completion of the Chip Design Skills curriculum

Purdue Orbital — Propulsion Team

Fall 2026 – Current

Purdue University

- Member of the propulsion team for Project Cygnet, a student-led effort to design, build, and test an affordable orbital launch system for the space and defense industry
- Gaining hands-on experience as an electrical engineer in the aerospace industry, with access to test and development work at Purdue's Zucrow Laboratories

Leadership Experiences

Design Leader and Outreach Lead

2020 – Summer 2026

FIRST Tech Challenge (FTC) Team 18996

- Lead meetings with design team to come up with requirements for subsystem designs for all the robots for the past 5 years
- Lead outreach activities for the past 3 years: these include heading a team of four members to send emails to more than 100 possible partners and sponsors; organizing three weekly educational events with partners and meet-ups with sponsors to discuss details; teaching STEM principles to underserved kids in Baltimore, partnering with the non-profit Dayspring
- Team advanced to the Chesapeake FTC Regional Competition; was a Semi-Finalist in 2023 and 2024; received Think Award

Captain, Cross Country Varsity

2023 – Summer 2026

Cross Country and Track, River Hill High School

- Received Varsity Letter every year in high school; selected to be Captain in the senior year
